## Ultra™ Series Ultra™ Watertight

*Ultra™ watertight is an integrated full bodied waterproofing system that protects the concrete from water penetration. Ideal for foundations, basements and structures in continuous contact with water or aggressive environments.*

### APPLICATIONS

*Ultra™ Watertight can be used in many specific construction applications including:*

- All underground applications
- Sewage and water treatment tanks
- Tunnel and subway systems
- Swimming pools
- Foundations
- Basements
- Marine Structures
- Car parks

### ADVANTAGES OF ULTRA™ WATERTIGHT

- Cost effective
- Easy to place
- Increased durability for the structures in constant contact with water
- Low permeability
- Reduce the potential problem in steel corrosion
- Reduce problems with the water penetration in the structures [humidity stain]

## CHARACTERISTICS OF ULTRA™ WATERTIGHT

- Reduction in the water penetration and waterproof properties in the final product
- Additional protection against the attack of aggressive agents, as a consequence of the capillary absorption reduction
- Enhanced concrete durability

## RECOMMENDATIONS

- Addition & any other material to the *Ultra™ Watertight* mix design without technical advice may damage the product performance
- The standard rules for good concrete practice and placing must be strictly observed with proper curing procedures as required by normal concrete mixes

*Consult the READYMIX MUSCAT LLC / PREMIX LLC technical department for further information.*

## SAFETY PRECAUTIONS

The use of safety goggles, gloves and suitable footwear is recommended when placing concrete

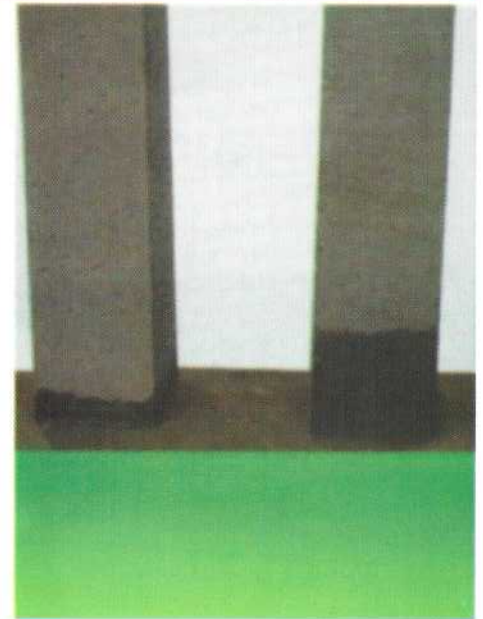

## FIRST AID

**Eyes:** Immediately flush eyes, including under lids, with water for at least 15 minutes to remove all particles. If necessary, seek medical advice.

**Skin:** Wash skin with cold water and a pH neutral soap as soon as possible, except where open wounds are visible. Attention should be paid to wounds and fresh scars which should be covered with protective paraffin gauze. Seek medical help in cases of prolonged contact with wet concrete.

**Ingestion:** Rinse mouth with clear water. If swallowing has occurred drink plenty of milk or water. Do not induce vomiting. Seek medical attention immediately minutes to remove all particles. If necessary, seek medical advice.

**Inhalation:** Move to fresh air. If symptoms persist seek medical attention.
